

People's Light Drive-In Concerts now linked to Listen Technologies' Listen EVERYWHERE App

Stream live event audio through your smartphone's Wi-Fi connection! The Listen EVERYWHERE app is among many solutions available through Listen Technologies' portfolio of innovative assistive listening products. People's Light Drive-In Concerts are now set up to livestream concert audio over Wi-Fi via the venue's sound system directly to your smart phone.

Follow the steps below to download the Listen EVERYWHERE app. You can download in advance, but steps 2 and 3 can only be completed at the concert location. If you require assistance, a staff member is more than happy to help!

STEP 1: Download the Listen EVERYWHERE app, available for Android, Google Play, and Apple. Visit your app store and search "Listen Everywhere" or open your phone's camera and scan the QR code below:

STEP 2: Upon arrival at People's Light's, connect to the venue's Wi-Fi, labeled "stage," and enter the password as "password." Yes, really! The password is "password" (no quotation marks).

STEP 3: Open the Listen EVERYWHERE app. The concert audio should sync automatically once you have connected to the "stage" Wi-Fi network. Then plug in those headphones and stream concert audio through your phone!

These instructions will be distributed at the concert. Please note that People's Light staff can only provide technical assistance downloading the app at the concert venue.
